

A line graph with a light gray background and a black border. The y-axis is on the left, with 10 tick marks but no numerical labels. The x-axis is at the bottom, with a single label '4 ms' centered below it. Four curves are plotted, all starting from a common baseline at the left. The green curve rises most steeply, reaching the highest plateau. The blue curve rises next, reaching a plateau slightly below the green one. The orange curve rises more gradually, reaching a plateau below the blue one. The red curve rises most gradually, reaching the lowest plateau. All curves appear to be approaching a steady state.

Curve Color	Relative Final Height (approximate)
Green	9.5
Blue	8.5
Orange	7.5
Red	6.5
